Subject: FYI - NBC Bay Area interview request - Hunters Point

Just a quick heads up that NBC Bay Area (KNTV) producer Liz Wagner has requested a phone interview (on background) with Lily regarding EPA superfund cleanup guidelines. This is in regards to NBC Bay Area's series of reports on the cleanup of the Hunters Point Shipyard.

She said that she has questions about what cleanup standards the EPA is using for superfund sites like Hunters Point. And that she will ultimately be requesting an on-the-record interview but thought it would be helpful to have a phone call first.

She is available next Monday and Tuesday for the call.

Rusty and I will discuss with Bill/Kelly at Monday morning's OPA meeting.

Thanks,

Michele
